

**Our Results**

• **Theorem:** For  $0 < p < 2$ , can approximate  $F_p(x)$  up to  $1 \pm \varepsilon$  using  $\varepsilon^{-2} \log n$  bits of space and  $O(\log n)$  update time

- Valid only for  $\varepsilon < 1/n^c$

- Improves on  $O(\log^2 n \log \log n)$  update time of [KNPW '11]
