

Sketching for Approximate Matrix Multiplication

• We want to compute

- $Q^{\otimes p}$ and $K^{\otimes p}$ can have a large number of columns

• Can we compute matrices Q' and K' such that $Q^{\otimes p} \cdot (K^{\otimes p})^T \approx Q' \cdot (K')^T$?

- We can approximate using $\text{LT}(Q' \cdot (K')^T) \cdot V$
